

# PROJECT BRIEF

REDEV2COIN

redev2 coin

# INTRODUCTION

RedeCoin (REDEV2) is a cryptocurrency built on the Ethereum Virtual Machine (EVM) network utilizing the ETHASH algorithm. This whitepaper outlines RedeCoin's key features, specifications, roadmap, network infrastructure, services, and future prospects.

REDEV2 integrates a Proof of Stake (PoS) consensus mechanism for staking, enhancing security, scalability and decentralization. This dual-layered approach ensures the security and trust underlying the network's operations.

# ABOUT REDEV2 COIN

## ENHANCED SECURITY

REDEV2 leverages the Ethereum network's established security protocols and integrates a PoS mechanism, ensuring a secure platform for transactions and smart contract execution.

## SCALABILITY

With PoS implementation, REDEV2 addresses scalability challenges common in PoW systems, enabling increased transaction throughput and network efficiency.

## DECENTRALIZATION

By combining PoS with Ethereum's inherent decentralization, REDEV2 fosters a democratic ecosystem, where all participants can validate transactions and contribute to network consensus.

## ENERGY EFFICIENCY

REDEV2's PoS mechanism significantly reduces energy consumption compared to PoW-based cryptocurrencies, promoting sustainability.

## COMMUNITY GOVERNANCE

REDEV2 facilitates community governance, allowing stakeholders to participate in decision-making processes regarding network upgrades and protocol changes.

## COMPATIBILITY

Being built on the Ethereum network, REDEV2 seamlessly integrates with existing Ethereum-based dApps and smart contracts, enhancing platform utility and interoperability.

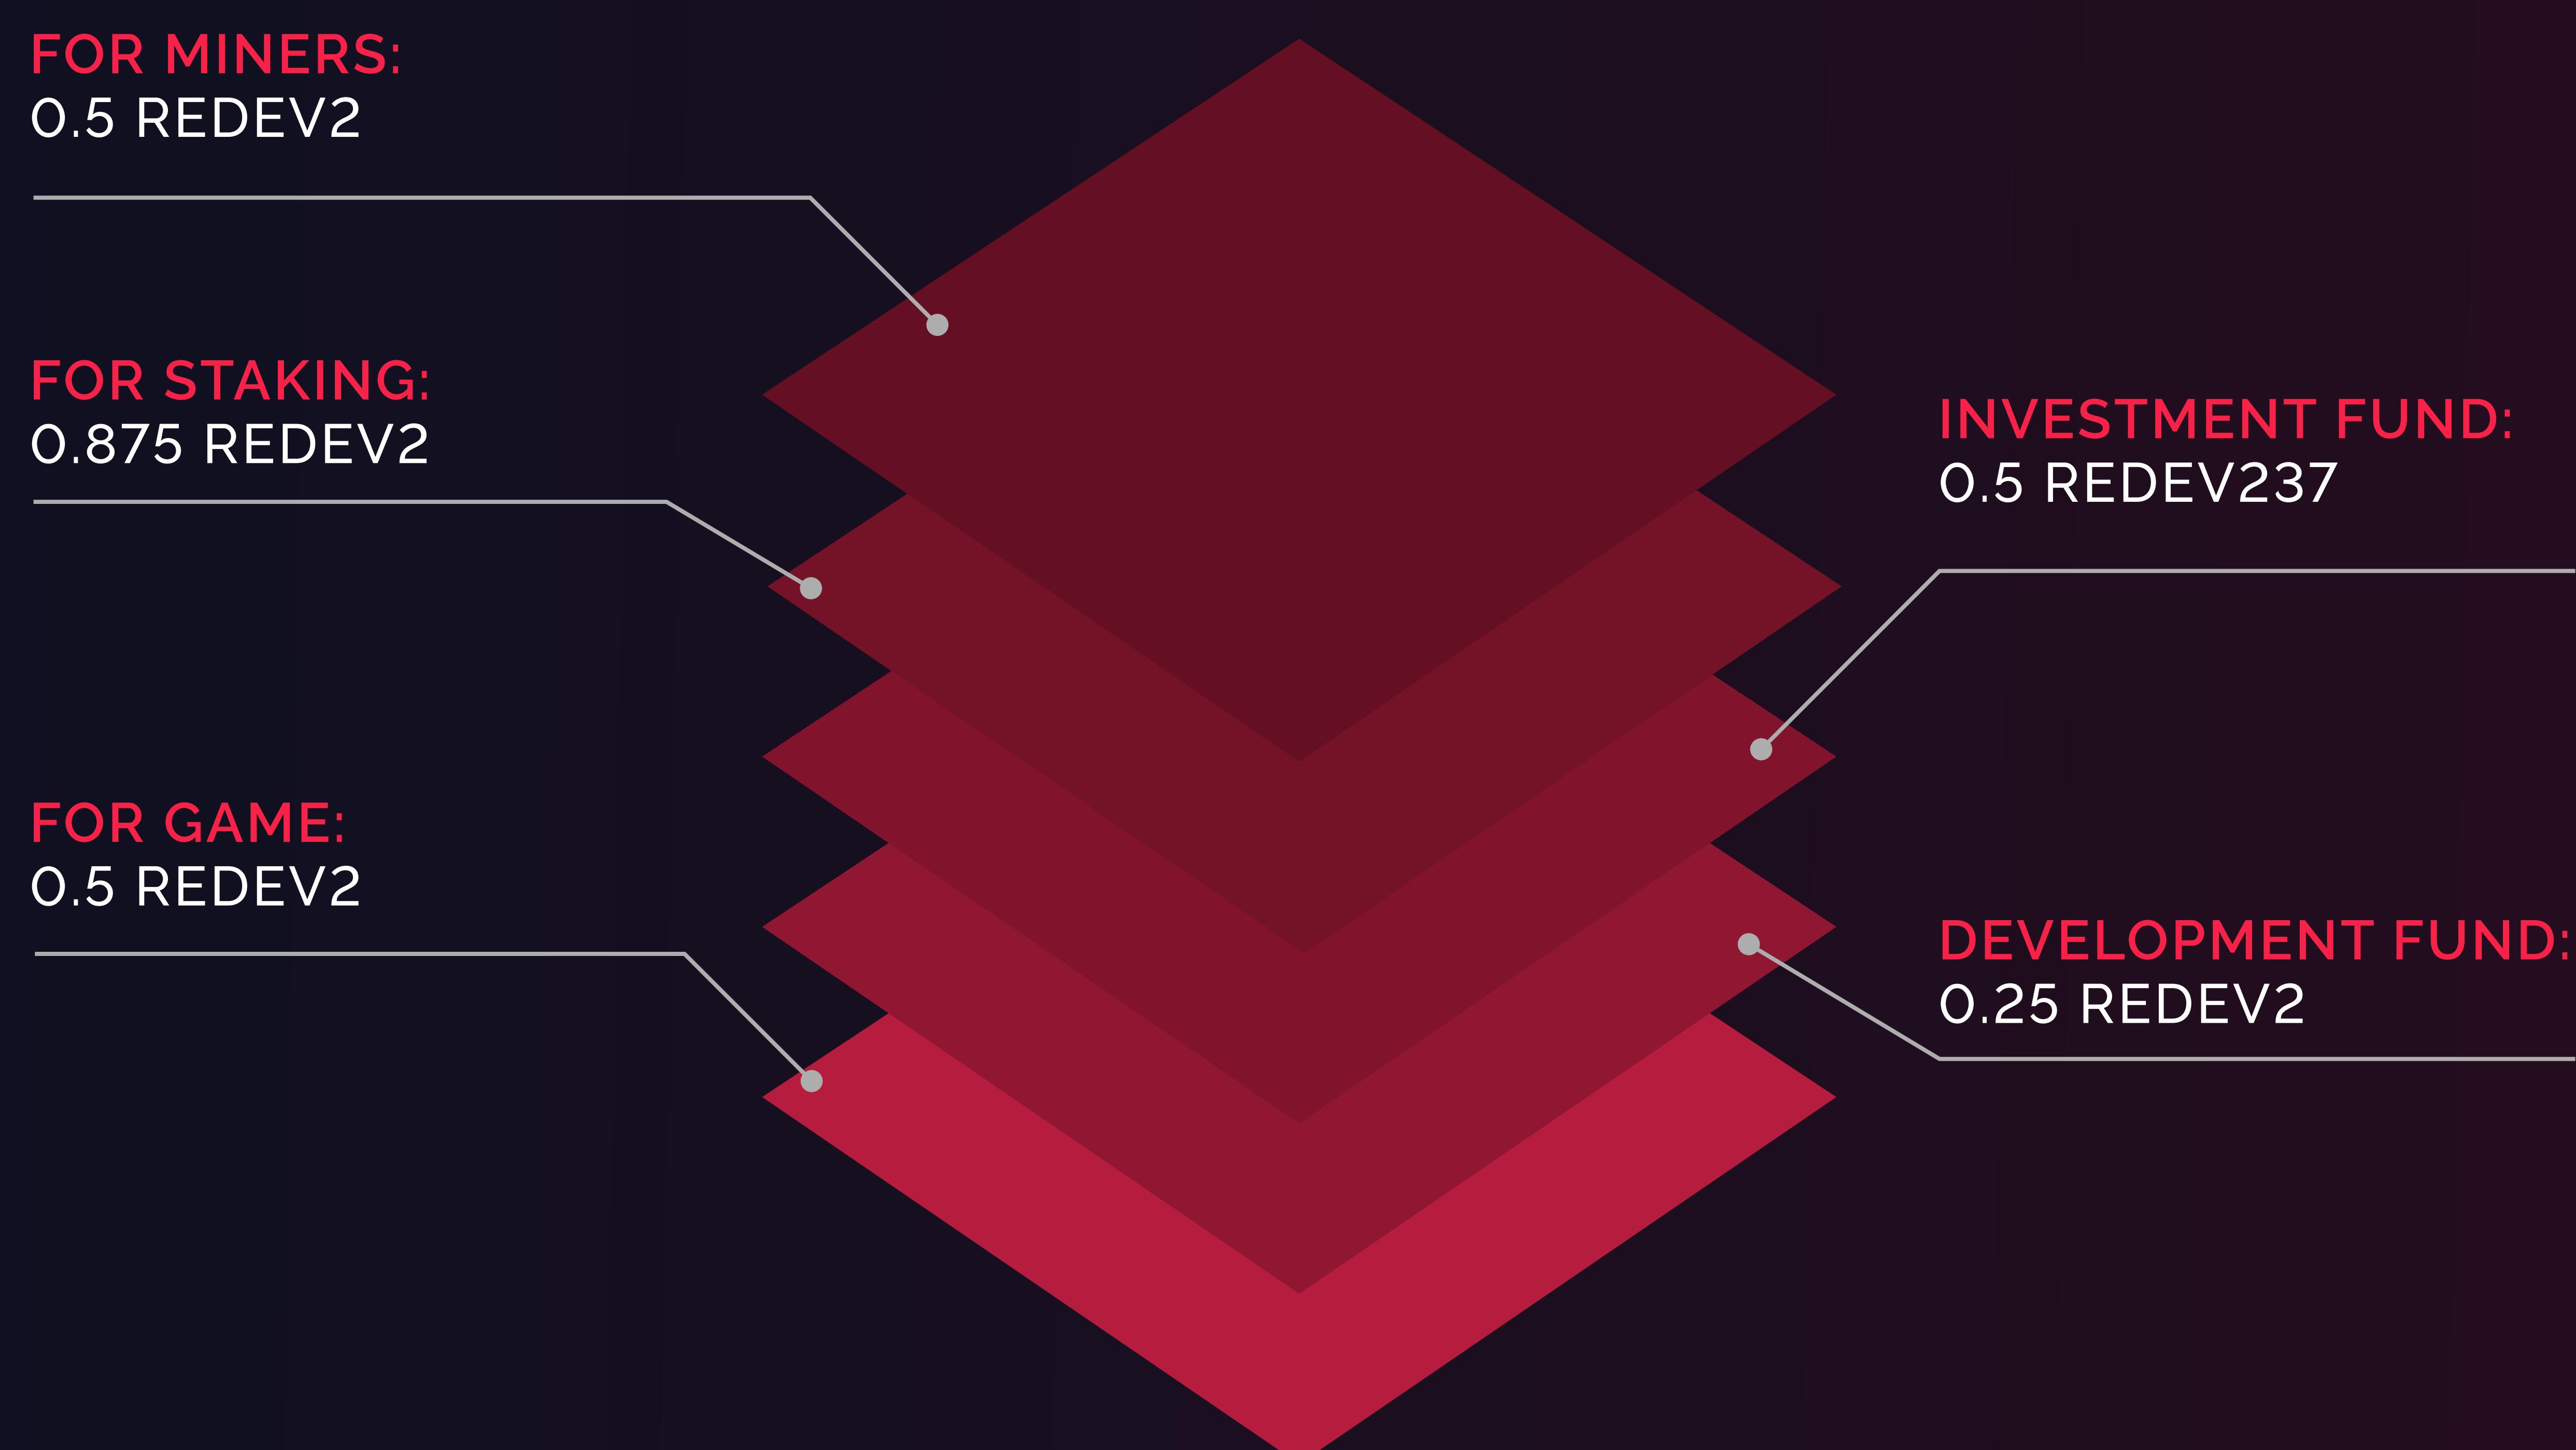

# SPECIFICATIONS

**TOTAL COIN SUPPLY** Unlimited

**ALGORITHM** ETHASH

**BLOCK TIME** 15 seconds

**BLOCK REWARD** 2.5 REDEV2

# ROADMAP

## Completed:

- ✓ **REDEV2 Code Development:** Significant progress has been made in developing the REDEV2 codebase, laying the foundation for future enhancements and features.
- ✓ **Official Mining Pool:** The launch of the official mining pool provides a convenient platform for mining REDEV2 coins, enhancing network security and decentralization.
- ✓ **Staking Platform:** Introduction of the staking platform allows users to earn rewards by holding and staking REDEV2 coins, incentivizing long-term participation and network stability.
- ✓ **VPN Platform:** The proprietary VPN platform ensures user privacy and security, enhancing the ecosystem by providing a trusted solution for anonymous online activities.
- ✓ **Listings on Exchanges:** REDEV2 has been listed on Xeggex, CoinStore, NonKYC, and PACex.io exchanges, increasing accessibility and liquidity within the cryptocurrency market.
- ✓ **Node Installation Script:** The release of the node installation script simplifies the process of setting up a node on personal servers, encouraging broader participation in network validation and governance.
- ✓ **CoinPaprika Listing:** Listing on CoinPaprika provides users with market data and analytics, enhancing transparency and facilitating informed investment decisions.
- ✓ **Integration with PAC Game Center:** Integrating REDEV2 into PAC Game Center enhances its utility and exposure within the gaming community, potentially attracting new users and driving adoption.

# ROADMAP

## Ongoing and Future Plans:

- ◆ **Listing on Aggregators:** Adding REDEV2 to additional aggregators such as LiveCoinWatch, Binance, ByBit, CoinMarketCap, CoinGecko, and Crypto.Com will enhance its visibility and accessibility to a broader audience of investors and traders.
- ◆ **Partner and Investor Search:** Continuously seeking partners and investors fosters strategic collaborations and secure funding for future development and expansion initiatives, strengthening the REDEV2 ecosystem.
- ◆ **New Exchange Listings:** Pursuing listings on more Tier-2 exchanges to increase liquidity and trading volume, thereby improving market dynamics and price stability.
- ◆ **Real-Life Payments Integration:** Integrating REDEV2 into real-life payments, especially in fast food establishments, offers a practical use case for cryptocurrency, promoting adoption and mainstream acceptance.
- ◆ **Xredx.com V2.0 - New Life:** The upcoming major update to Xredx.org exchange will enhance user experience and functionality, attracting new traders and investors to the platform.
- ◆ **Staking on Xredx.com:** Incorporating staking functionality directly into the exchange simplifies asset management and provides users with additional earning opportunities, further incentivizing participation in the REDEV2 ecosystem.
- ◆ **Game Character Creator Portal:** Introducing a toolkit for game developers streamlines character creation processes, fostering innovation and creativity within the gaming industry.
- ◆ **Hardware Rental Service:** Launching a hardware rental service provides users with access to high computing power at a low cost, catering to both target users and those with specific computing needs, thereby expanding the utility of REDEV2 beyond traditional cryptocurrency applications.
- ◆ **Operating System for Miners:** Developing a service focused to the needs of mining enthusiasts, offering a comprehensive suite of tools and functionalities to empower users to control their mining rigs and maximize their mining potential.

# REDEV2 NETWORK

## METAMASK SETTINGS

NETWORK NAME: REDEV2

RPC URL: <https://rpc2.redecoin.eu/>

CHAIN ID: 1972

SYMBOL: REDEV2

EXPLORER URL: <https://explorer3.redecoin.eu/>

# SERVICES

## NODE SCRIPT

Our script simplifies the deployment of a REDEV2 node on servers, catering to users of all levels. With straightforward commands, users can set up their own node, contributing to the decentralized network and validating transactions.

## VPN PLATFORM

Our platform offers a comprehensive solution for anonymizing internet activities, providing users with affordable Virtual Private Server (VPS) hosting payable with REDEV2 coins. With a focus on affordability and accessibility, our platform empowers individuals to take control of their online privacy without breaking the law. By accepting REDEV2 coins as payment, we promote the adoption and utility of our native cryptocurrency while offering a valuable service to users worldwide.

## MINING POOL

Our official Mining Pool provides miners with a reliable platform to earn REDEV2 coins efficiently.

## HARDWARE RENTAL SERVICE

Hardware Rental Service will change the way users access computing power for cryptocurrency mining. Similar to platforms like Nicehash or Mining Rig Rentals, our service will allow users to rent computing power at a low cost and with unparalleled efficiency. Whether you need additional hashing power for a short-term project or want to optimize your mining setup, our Hardware Rental Service will provide a flexible and accessible solution. By democratizing access to computing resources, we empower users to maximize their mining potential and participate in the cryptocurrency ecosystem on their own terms.

## STAKING

Staking is a feature that allows REDEV2 coin holders to earn passive income simply by holding their tokens in a compatible wallet. By staking REDEV2 coins, users contribute to network security and stability while being rewarded with additional tokens over time.

## LIGHTWEIGHT OPERATING SYSTEM

Mining Operating System is poised to transform the way miners manage their operations. Similar to popular platforms like HiveOS or RaveOS, our operating system is designed to streamline cryptocurrency mining operations, offering a user-friendly interface and powerful features for optimizing performance and efficiency. With support for various mining algorithms and seamless integration with mining hardware, our operating system empowers miners to maximize their productivity and profitability. By simplifying the complexities of mining management, we aim to make cryptocurrency mining accessible to a broader audience and drive innovation within the industry.

# CONCLUSION

In summary, RedeCoin (REDEV2) has made significant strides in advancing its technological offerings to the cryptocurrency community. With the implementation of features such as staking, a proprietary VPN platform, and a simplified node installation script, REDEV2 aims to enhance user experience and functionality within the blockchain ecosystem.

Through these developments, REDEV2 prioritizes security, accessibility, and efficiency, addressing key challenges faced by cryptocurrency users and miners. By providing tools like the Node Script for streamlined server deployment and the VPN Platform for anonymizing internet activities, REDEV2 empowers users to take control of their digital assets and privacy.

Looking ahead, REDEV2 continues to focus on furthering its technological capabilities, with ongoing projects such as the Hardware Rental Service and Lightweight Operating System. These initiatives aim to bolster the infrastructure supporting REDEV2, ultimately contributing to the resilience and sustainability of the network.

In closing, REDEV2 remains committed to its mission of developing a decentralized and inclusive financial ecosystem.

We invite technical enthusiasts and stakeholders to explore the possibilities of REDEV2 coin and join us in shaping the future of cryptocurrency.
